Banner Object:Access Architecture

Each of the Banner systems contains a wealth of information stored within a myriad of database tables. Banner Object:Access is a technical architecture designed to make it easier for you to access that information. The result is increased ability to create ad hoc reports easily and quickly.

The Object:Access architecture uses logical views to bring together the essential fields for a specific area of reporting. These all encompassing views offer you the ability to tailor reports to your specific needs using the reporting tool of your choice. Without Banner Object:Access, which combines the information for you, you would need an extensive knowledge of Structured Query Language (SQL) to combine information from several tables into one report.

Object:Access Terms

Before using the Object:Access views, there are some general terms you need to know. Knowing what these terms mean will increase your understanding of how the Object:Access views work and make using the views much easier.

View

A view, or logical view, is a grouping of information. They are called “logical” views because the information in the view is grouped in a logical order, putting related information in the same section of the view. For instance, in the Object:Access people-related views you will find all of the name information together at the beginning of the view, followed by personal, biographic, and demographic information.

Most of the information in a view comes from fields within the Banner database tables. Some information is calculated based on database fields or retrieved using an Oracle function. A single view can include up to 255 pieces of information, called attributes.

Attribute

An attribute is one piece of information within a view. Many of the attributes in the Object:Access views come directly from a field in the Banner database. Other attributes are derived from Banner fields either through calculations or the logic defined in a function.

Function

A function is a small piece of code that uses some specified logic to get information from the Banner database that isn't stored as a single field. For example, "Age" is not stored as a field in Banner. Using a function that subtracts birthdate from today's date and then determines whether the birth month has passed, we are able to provide age as an attribute in many of the Object:Access views.

Ultimately, the use of functions in the Object:Access views expands the Banner database. You can get calculated information by selecting a single attribute rather than having to set up the calculation in your report.

Key Attribute

Certain attributes within each view are called "key attributes". The key attributes determine the level of information returned by the view. It is important for you to know the level at which information in a view is returned.

This concept is illustrated in the sample Human Resources report below. In the sample, the key attributes differentiate whether a view returns one row of information for each person per position or simply one row for each person. In this report there is one row of information for each position that a person applied for, not just one row per person. This is because the key attributes of the view used to create the report are the **Applicant's PIDM** and the **Position Applied For**.

Position Applicant List

Name	Position	Position Title	Degree
Sam Abrams	DIR001	Director, HR	MS
	DIR002	Director, Payroll	MS
Kevin Dillon	DIR001	Director, HR	MBA
Sara Harper	DIR004	Director, Benefits	MS
Clare Jones	DIR001	Director, HR	MBA
	DIR002	Director, Payroll	MBA
	DIR004	Director, Benefits	MBA

Notice that multiple rows are returned when a person has applied for more than one position.

Mandatory/Recommended Condition

Some views contain mandatory or recommended conditions. In order to obtain information at the level identified by the key attributes, you must supply these conditions when you create your report. (Refer to the [“Key Attribute”](#) section for more information about this.) In many of the Student system views, you need to provide a term to obtain the results described in the view. The two sample reports below compare the results that occur when a term *is not* provided and when a term *is* provided.

Sample Report 1

List of Students by State				
Name	State	Phone	Term	
Tim Parker	PA	555-243-9765	200701	The mandatory condition TERM_CODE_KEY was not supplied, so there is a row for every term in the database.
Tim Parker	PA	555-243-9765	200703	
Tim Parker	PA	555-243-9765	200801	
Allison Parshaw	OR	555-624-8339	200801	
Omar Patil	IL	555-978-4122	200703	
Omar Patil	IL	555-978-4122	200801	

Sample Report 2

List of Students by State				
Name	State	Phone	Term	
Tim Parker	PA	555-243-9765	200801	The mandatory condition TERM_CODE_KEY = 200801 was supplied, so only the rows in that term were returned.
Allison Parshaw	OR	555-624-8339	200801	
Omar Patil	IL	555-978-4122	200801	

In some cases the first sample report may be what you want. If so, do not supply the mandatory condition for the view. Basically, you need to supply the mandatory conditions to ensure the view works as it was designed to meet the specified reporting need.

Note

In some cases, performance may be an issue if a mandatory condition is not supplied. ■

Repeating Groups

Several areas of Banner allow multiple values to be stored in a record. Some examples of fields that can have more than one value are address, donor category, and test code. To allow retrieval of more than one value for a field, Banner Object:Access flattens out some fields. This means that where a Banner table may store five values of a particular code in one field, Object:Access has five attributes, one for each value. These attributes are called a repeating group.

The example below shows how Tim Parker's four test codes are stored in the database and how they are reported using Banner Object:Access.

Name	Test Code	
	(SORTTEST_TESC_CODE)	
Tim Parker	SATV]————— In the database, multiple values for a field are stored in the same field in the Banner table.
Tim Parker	SATM	
Tim Parker	ACT	
Tim Parker	GRE	

Name	Test Codes	
	(TEST_CODE1 TEST_CODE2 TEST_CODE3 TEST_CODE4)	
Tim Parker	SATV SATM ACT GRE	————— In the O:A views, multiple values are flattened out, allowing for detail reports with one row per person.

Due to the limit of 255 attributes per view, Banner fields are carefully selected for inclusion in each view. The size limitation affects repeating groups the most.

For example, suppose you store ten different addresses for one person in the Address Repeating Table (SPRADDR). Most of the Object:Access views retrieve eleven fields of address information from this table. Each field is considered a different attribute in the view. If we allow space to retrieve these eleven attributes for all ten addresses, we will use 110 of the 255 attributes allowed. You can see how the number of attributes can quickly add up.

Tip

Each repeating group has a limit on the number of values returned. ■

Therefore, sensible limits are set within each view for retrieving information for a repeating group. For example, most of the Object:Access people-related views let you retrieve information on two addresses per person. This uses only 22 attributes instead of the 110 used in the scenario above. Addresses are just one example of a repeating group.

With the capability to retrieve multiple code values (repeating groups), comes the need to identify which values you want to retrieve. You do this through the Crosswalk/Concept Validation Form (GTVSDAX), which you must set up to meet your institution's reporting needs. Refer to the *GTVSDAX Handbook* for a complete description of GTVSDAX and how to properly set it up.

Indicators

Two special kinds of indicators were developed to increase the usefulness of the Object:Access views. We call the first kind of indicator "Information Indicators" and the second kind "Additional Entries Flags".

Information Indicators

Several of the Object:Access views contain indicators that are not stored in the Banner database tables. These indicators identify information that is not readily available in a Banner field, like whether or not a student has applied for admission, paid a deposit, or enrolled at the institution. Banner Object:Access uses PL/SQL functions to define these indicators with the Banner default definition. Information indicators are located at the beginning of each view immediately following the key attributes.

For example, in the Advancement system the Constituent Identification view includes a **Donor Indicator** that contains a *Y* if the person/ID has a record on the Giving History By Campaign Repeating Table (APRCHIS). Similarly, some of the views in the Student and Financial Aid systems include a **Complete Admissions Application Indicator** that contains a *Y* if the SARADAP_APST_CODE = complete.

Additional Entries Flag

Additional entries flags are a particular kind of indicator used in conjunction with repeating groups. Since repeating groups limit the amount of information returned, it's possible that some people will have more information than the view allows. An Additional Entries Flag indicator gives users a way to identify when a record has exceeded the limit of the repeating group. The indicator contains a *Y* when a code has more values in the Banner database than will fit in the attributes allotted in the view. The indicator contains an *N* when there isn't an overflow condition.

The criteria used to return information to the view from the database is the same criteria used to determine whether to set an additional entries flag to *Y*.

Example

Suppose that a constituent has four children in the Advancement system. The views retrieve information about the three oldest children based on their birthdates. The **Additional Children Flag** (ADD_CHILDREN_FLAG) would have a *Y* in it because the constituent has more than three children.

Logic on the GTVSDAX Form

For codes specified via GTVSDAX, the additional entries flag is only set to *Y* when there are multiple codes in the database for the particular selection criteria specified on GTVSDAX.

Examples Using GTVSDAX Logic

The Advancement Mail Code concept retrieves information related to four mail codes. Suppose that BUS, ART, RES, and CPS are the four values specified on GTVSDAX.

1. A person who has *one* code for each of these values *plus three codes with other values would not* have a *Y* in the Additional Mail Codes attribute because they do not have additional codes of those specified on GTVSDAX.
2. A person who has no BUS or ART codes, *two RES codes*, and one CPS code *would have* a *Y* in the Additional Mail Code attribute because they have more RES code values than will fit in the view.

Addresses

It is important to note that people with inactive addresses as well as people with active addresses may need to be included for some reports. You have the flexibility to choose the desired address status: active, inactive, or both.

Telephone Numbers

Telephone numbers stored as *unlisted* will not be returned using the Object:Access views. Asterisks (**) replace the actual numbers in any telephone number attributes that are unlisted, i.e., when SPRTLE_UNLIST_IND = Y.

What Is A PIDM?

If you've worked with Banner, you've probably heard the term PIDM. Since PIDM is a key attribute in many of the Object:Access views, it is important that you understand what one is. The list below highlights aspects of a PIDM that will help you better understand the concept.

- PIDM stands for Personal Identification Master.
- A PIDM is an internal identification number which Banner assigns to various entities, such as a person or company.
- It is an internal number that users do not see.
- The PIDM is unique to each entity; therefore two different entities, like people or companies, will not have the same PIDM.

- The PIDM for a particular entity is the same across all products and modules.
- Since a PIDM can be related to a person/entity and the PIDM is consistent across the Banner system, it is often the only thing that a person/entity has in common throughout the many tables in the database.
- Because it is unique and because it is often the one piece of information that is the same among tables, a PIDM is used to join tables. (Joining tables is what enables you to access data from many different areas in the Banner database. Table joins are an important aspect of the Object:Access architecture.)

Manual Layout

The topics in this section describe the layout of this manual and offer tips on how to use the manual to get the most from it.

View Layout

The information for each view is laid out in the same format throughout this manual. The organization of information should provide easy identification of specific pieces of information within each view. The view information includes:

- view name
- reporting need the view is intended to meet
- how you might use the view
- key attributes
- mandatory conditions required to ensure the view returns the correct information
- description of the information returned by the view
- list of the attributes included in the view

View Name

Each Object:Access view is named based on the information included in it and its intended purpose. When you are using the views via your reporting tool, you may see an abbreviated view name. The abbreviations keep a friendly readable structure.

Prefix

A two letter prefix is included with each name. The first letter of the prefix is always “A” so that all view names will sort to the beginning of the selection list when you access them through a reporting tool. That way you can easily find the views in the list. The second letter of the prefix identifies the system or module that the view is from. The prefixes used for each system or module are listed below.

Object:Access View Prefix	Banner System or Module
AA	Advancement
AF	Finance
AG	General
AP	Human Resources
AR	Financial Aid
AS	Student
AT	Accounts Receivable

For example, Admissions Applicant is one of the views in Student. As its name implies, this view includes information that you can use to make reports related to admissions applicants and the admissions process. The abbreviated name that appears for this view when you use a reporting tool is AS_ADMISSIONS_APPLICANT.

Attribute List

Each view described in this manual includes a list of all the attributes included in the view. These lists will be road maps for you as you use the Object:Access views. Each list coincides with the attribute list that appears when you’re setting up a report using a reporting tool. You can read through the list of attributes to determine which ones you want to include in your report.

The attribute lists are set up in a table format and include the following information:

- reference number of attribute
- attribute name in Banner Object:Access
- attribute description
- primary Banner form where the attribute appears
- Banner database field that is the source of the attribute or the function used to obtain the attribute

The following illustration shows a sample entry from an attribute list.

Reference Numbers

Each attribute has a reference number. This reference number helps you easily identify each attribute in a view list. The reference number is in the first column of each attribute list (see illustration above for an example.) Reference Numbers are assigned using a three level numbering convention. S3.17 is a typical attribute reference number. Each level of numbering identifies an aspect of the attribute—the system, view, and attribute.

Level 1		Level 2		Level 3	
Identifies the primary system in which the view is used.		Identifies the number of the view within its primary system.		Identifies the number of the attribute within the view.	
A	Advancement	1	View #1	1	Attribute #1
F	Finance	2	View #2	2	Attribute #2
G	General	X	View #X	X	Attribute #X
P	Human Resources				
R	Financial Aid				
S	Student				
T	Accounts Receivable				

As an example, look at the reference number S3.17 below.

S Student 3 View #3 17 Attribute #17

This reference number refers to the Student system, view 3—Admissions Applicant, attribute 17, the Admission Applicant Last Name attribute.

How to Create a Report

How you actually create a report using the Object:Access views depends largely on the reporting tool that you use to make your reports. You should refer to the documentation delivered with your reporting tool for specific instructions on accessing the Banner Object:Access views and creating reports.

Though the tool you use to create reports with the Object:Access views can vary, there are some steps of report creation that remain fairly consistent no matter what the tool. They are outlined below.

Tip

Be sure to supplement these steps with the instructions delivered with the reporting tool you use. ■

1. *Analyze the report requirements*

Before you begin creating a report, determine what information you want to include in it. This information will help you figure out which view you need to use to build the report. Also, refer to the attribute list with each view to help you make this determination.

2. *Construct the query*

This includes all the aspects of specifying the information you want to include on your report. Depending on the tool you use, you may do some or all of the following at this point:

- select the attributes to include in the report
- create additional attributes by manipulating existing attributes
- specify sorting conditions and other criteria
- specify the conditions of the query (this is where you supply key attributes and mandatory conditions)

3. *Lay out the report*

Create the look of the report, following the directions of your reporting tool.

4. *Run the query*

This is also considered *running the report* and will vary by reporting tool.

2

Financial Aid Object:Access Views

This chapter describes the following logical views created for use in the Financial Aid system.

- [“Financial Aid Applicant” on page 2-2](#)
- [“Budget Components” on page 2-23](#)
- [“Tracking Requirements” on page 2-26](#)
- [“Award Detail by Year” on page 2-30](#)
- [“Award Detail by Term” on page 2-43](#)
- [“Student Summary for Financial Aid” on page 2-56](#)

View 1: Financial Aid Applicant

AR_FINAID_APPLICANT

If you are using FOCUS, the view name is RCVAPL0.

Use this view to access the most relevant information related to financial aid applicants including addresses, telephone numbers, admissions application data, application decisions, general student data, parent income and assets, financial need, contribution, verification, tracking requirements, and budget components.

Additionally, this view includes core student information from the Admissions Application Repeating Table (SARADAP), the Student Application Decision Repeating Table (SARAPPD), and the Student Base Table (SGBSTDN). The core student information will allow you to identify various populations of admissions applicants or students.

Tip

If the student-related information in this view is not sufficient for your needs, join to the Student Summary for Financial Aid view to obtain more student information.

If the limits allowed for budget and tracking information in this view are not sufficient, join with the Budget Components or Tracking Requirements view to get the needed attributes. ■

Below is a list of the main database tables accessed by this view.

- RBBABUD Applicant Budget Table
- RBRACMP Applicant Budget Component Table
- RCRAPP1 Financial Aid Application Table - Part 1
- RCRAPP2 Financial Aid Application Table - Part 2
- RCRAPP4 Financial Aid Application Table - Part 4
- RFRBASE Fund Base Table
- RORSTAT Applicant Status Base Table
- RRRAREQ Applicant Requirements Table
- SARADAP Admissions Application Repeating Table
- SARAPPD Student Application Decision Repeating Table
- SGBSTDN Student Base Table
- SPBPERS Basic Person Base Table
- SPRADDR Address Repeating Table

- SPRIDEN Person Identification/Name Repeating Table
- SPRTELE Telephone Table

Key Attributes

Tip

Refer to the Overview chapter for a complete description of a PIDM. ■

The key attributes of this view are

- Fin. Aid Applicant Personal ID Master PIDM_KEY
- Financial Aid Applicant Aid Year AID_YEAR_KEY

Since the PIDM is an internal ID number unique to each financial aid applicant, this view returns the most current record (one row) for each applicant per aid year.

Note

The CURRENT_RECORD_IND is set to Y so that only the most current record is returned for each applicant. ■

Mandatory Conditions

The following condition *must* be supplied for the view to report information at the level identified by the key attributes.

- Financial Aid Applicant Aid Year AID_YEAR_KEY

Attributes

The list below specifies the attributes included in the Financial Aid Applicant (AR_FINAID_APPLICANT) view. The list also indicates the primary Banner form and the database field or function that is the source for each attribute.

Note

An xx in a financial aid form name represents the two digits that change from year to year. ■

Table 1: Financial Aid Applicant View Attributes

Ref. No.	Attribute	Source Form	Source Field or Function Name
R1.1	Fin. Aid Applicant Personal ID Master Key PIDM_KEY	N/A	RORSTAT_PIDM
R1.2	Financial Aid Applicant Aid Year Key AID_YEAR_KEY	ROASTAT	RORSTAT_AIDY_CODE
R1.3	Complete Admissions Application Ind. APPLICATION_COMPLETE_IND	Function	F_ADMS_APPLICATION_STATUS If SARADAP_APST_CODE = complete, put a Y in this field. Note: Saturn owns this function.
R1.4	Incomplete Admissions Application Ind. APPLICATION_INCOMPLETE_IND	Function	F_ADMS_APPLICATION_STATUS If SARADAP_APST_CODE = incomplete, put a Y in this field. Note: Saturn owns this function.
R1.5	Institution Accepted Applicant Indicator (Any Date) INST_ACCEPTED_APP_ANY_DATE_IND	Function	F_ADMS_check_STATUS If STVAPDC_INST_ACCEPT_IND = Y, put a Y in this field. Note: Saturn owns this function.
R1.6	Applicant Accepted Offer Ind. (Any Date) APPL_ACCEPT_OFFER_ANY_DATE_IND	Function	F_ADMS_check_STATUS If STVAPDC_STDN_ACCEPT_IND = Y, put a Y in this field. Note: Saturn owns this function.
R1.7	Institution Accepted Applicant Indicator (Most Recent Decision)	Function	F_ADMS_check_STATUS Note: Saturn owns this function.
R1.8	Applicant Accepted Offer Indicator (Most Recent Decision) APPL1_ACCEPT_OFFER_CURR_DEC_IND	Function	F_ADMS_CHECK_STATUS Note: Saturn owns this function.

Table 1: Financial Aid Applicant View Attributes (cont)

Ref. No.	Attribute	Source Form	Source Field or Function Name
R1.9	Institution Rejected Application Indicator INST_REJECTED_APPLICANT_IND	Function	F_ADMS_CHECK_STATUS Note: Saturn owns this function.
R1.10	Withdrawn Indicator APPLICANT_WITHDRAWN_IND	Function	F_ADMS_APPLICANT_WITHDRAWN Note: Saturn owns this function.
R1.11	Application Source APPLICATION_SOURCE_CODE	Function	RCRAPP1_INFC_CODE
R1.12	Application Source Description APPLICATION_SOURCE_DESC	RNANAXX	stvinfc_desc
R1.13	Application Sequence Number APPLICATION_SEQUENCE_NO	RNANAXX	RCRAPP1_SEQ_NO
R1.14	Current Record Indicator CURRENT_RECORD_IND	RNANAXX	RCRAPP1_CURR_REC_IND
R1.15	Fin. Aid Applicant ID STUDENT_ID	SPAIDEN	SPRIDEN_ID

View 2: Budget Components

AR_BUDGET_COMPONENTS

If you are using FOCUS, the view name is RBVBUD0.

Use this view to report on multiple budget components. By joining this view to the Financial Aid Applicant (AR_FINAID_APPLICANT) view, you can exceed the budget limit set in that view. Note that due to the key setup in this view, an applicant who has multiple Budget Components will appear multiple times on a report.

Tip

Join this view to the Financial Aid Applicant view to get information on multiple budget components. ■

Below is a list of the main database tables accessed by the Budget Components (AR_BUDGET_COMPONENTS) view.

- RBBABUD Applicant Budget Table
- RBRACMP Applicant Budget Component Table
- RCRAPP1 Financial Aid Application Table – Part 1
- RORSTAT Applicant Status Table
- SPRIDEN Person Identification/Name Repeating Table

Key Attributes

Tip

Refer to the Overview chapter for a complete description of a PIDM. ■

The key attributes of this view are

- Applicant Personal ID Master PIDM_KEY
- Budget Aid Year AID_YEAR_KEY
- Budget Type Code BUDGET_TYPE_CODE_KEY
- Budget Component Code BUDGET_COMPONENT_CODE_KEY

Since the PIDM is an internal ID number unique to each financial aid applicant, this view returns one row of information for every applicant for each unique combination of Budget Type and Budget Component per aid year.

Mandatory Conditions

The following condition *must* be supplied for the view to report information at the level identified by the key attributes.

- Budget Aid Year AID_YEAR_KEY

Attributes

The list below specifies the attributes included in the Budget Components (AR_BUDGET_COMPONENTS) view. The list also indicates the primary Banner form and the database field or function that is the source for each attribute.

R2.20	Total Budget TOTAL_BUDGET	Function	F_CALC_TOTAL_BUDGET Sum(RBRACMP_AMT) for components with the Budget Type Code (RBRACMP_BTYP_CODE) specified in the key.
R2.21	Budget Component Amount BUDGET_COMPONENT_AMOUNT	RBAABUD	RBRACMP_AMT

View 3: Tracking Requirements

AR_TRACKING_REQUIREMENTS

If you are using FOCUS, the view name is RRVREQ0.

By joining this view to the Financial Aid Applicant (AR_FINAID_APPLICANT) view, you can exceed the tracking requirements limit set in that view. Note that due to the key setup in this view, an applicant who has multiple Tracking Requirements will appear multiple times on a report.

Tip

Join this view to the Financial Aid Applicant view to get information on multiple tracking requirements. ■

Below is a list of the main database tables accessed by the Tracking Requirements (AR_TRACKING_REQUIREMENTS) view.

- RCRAPP1 Financial Aid Application Table – Part 1
- RFRBASE Fund Base Data Table
- RORSTAT Applicant Status Table
- RRRAREQ Applicant Requirements Table
- RRRTMSG Tracking Requirements Message Rules Table
- SPRIDEN Person Identification/Name Repeating Table

Key Attributes

Tip

Refer to the Overview chapter for a complete description of a PIDM. ■

The key attributes of this view are

- | | |
|------------------------------------|------------------------|
| • Personal ID Master | PIDM_KEY |
| • Aid Year | AID_YEAR_KEY |
| • Tracking Requirement Code | REQUIREMENT_CODE_KEY |
| • Tracking Requirement Description | REQUIREMENT_DESC_KEY |
| • CEEB College Code | SBGI_CODE_KEY |
| • Tracking Req. Fund Code | FUND_CODE_KEY |
| • Tracking Req. Message Code | MESSAGE_CODE_KEY |
| • Tracking Req. Message Seq. No. | MESSAGE_CODE_SEQNO_KEY |

Since the PIDM is an internal ID number unique to each financial aid applicant, this view returns one row of information for every PIDM per aid year for each unique combination of Tracking Requirement Code/Tracking Requirement Description, SBGI Code, Tracking Requirement Fund Code, Tracking Requirement Message Code, and Tracking Requirement Message Sequence Number.

Mandatory Conditions

The following conditions *must* be supplied for the view to report information at the level identified by the key attributes.

- Aid Year AID_YEAR_KEY

Attributes

The list below specifies the attributes included in the Tracking Requirements (AR_TRACKING_REQUIREMENTS) view. The list also indicates the primary Banner form and the database field or function that is the source for each attribute.

View 4: Award Detail by Year

AR_AWARD_DETAIL_BY_YEAR

If you are using FOCUS, the view name is RPVAWY0.

Use this view to access information related to the packaging, awarding, and disbursement of financial aid packages based on the aid year. The view includes information about parents, addresses, telephone numbers, the admissions application, application decisions, general student data, awards, funds, and need analysis. Use this view to create reports that detail financial aid awards by year.

Tip

Notice that this view is similar to the next one. Be sure to use the one appropriate for your reporting need. ■

Below is a list of the main database tables accessed by the Award Detail by Year (AR_AWARD_DETAIL_BY_YEAR) view.

- RCRAPP1 Financial Aid Application Table - Part 1
- RFRBASE Fund Base Data Table
- RPRAWRD Applicant Award Table
- SARADAP Admissions Application Repeating Table
- SARAPPD Student Application Decision Repeating Table
- SGBSTDN Student Base Table
- SPBPERS Basic Person Base Table
- SPRADDR Address Repeating Table
- SPRIDEN Person Identification/Name Repeating Table
- SPRTELE Telephone Table

Key Attributes

Tip

Refer to the Overview chapter for a complete description of a PIDM. ■

The key attributes of this view are:

- Fin. Aid Award Personal ID Master PIDM_KEY
- Award Aid Year AID_YEAR_KEY
- Fund Code FUND_CODE_KEY

Since the PIDM is an internal ID number unique to each financial aid award, this view returns one row of information per PIDM for every award per aid year.

Mandatory Conditions

The following condition *must* be supplied for the view to report information at the level identified by the key attributes.

- Award Aid Year AID_YEAR_KEY

Attributes

The list below specifies the attributes included in the Award Detail by Year (AR_AWARD_DETAIL_BY_YEAR) view. The list also indicates the primary Banner form and the database field or function that is the source for each attribute.

Table 4: Award Detail by Year View Attributes

Ref. No.	Attribute	Source Form	Source Field or Function Name
R4.1	Fin. Aid Award Personal ID Master Key PIDM_KEY	N/A	RPRAWRD_PIDM
R4.2	Award Aid Year Key AID_YEAR_KEY	RPAAWRD	RPRAWRD_AIDY_CODE
R4.3	Award Fund Code Key FUND_CODE_KEY	RPAAWRD	RPRAWRD_FUND_CODE
R4.4	Award Fund Description FUND_TITLE	RPAAWRD	RFRBASE_FUND_TITLE
R4.5	Complete Admissions Application Ind. APPLICATION_COMPLETE_IND	Function	F_ADMS_APPLICATION_STATUS If SARADAP_APST_CODE = complete, put a <i>Y</i> in this field. Saturn owns this function.
R4.6	Incomplete Admissions Application Ind. APPLICATION_INCOMPLETE_IND	Function	F_ADMS_APPLICATION_STATUS If SARADAP_APST_CODE = incomplete, put a <i>Y</i> in this field. Saturn owns this function.

Table 4: Award Detail by Year View Attributes (cont)

Ref. No.	Attribute	Source Form	Source Field or Function Name
R4.7	Institution Accepted Applicant Indicator (Any Date) INST_ACCEPTED_APP_ANY_DATE_IND	Function	F_ADMS_check_STATUS If STVAPDC_INST_ACCEPT_IND = Y, put a Y in this field. Saturn owns this function.
R4.8	Applicant Accepted Offer Ind. (Any Date) APPL_ACCEPT_OFFER_ANY_DATE_IND	Function	F_ADMS_check_STATUS If STVAPDC_STDN_ACCEPT_IND = Y, put a Y in this field. Saturn owns this function.
R4.9	Institution Accepted Applicant Indicator (Most Recent Decision) INST_ACCEPTED_APP_CURR_DEC_IND	Function	F_ADMS_check_STATUS If STVAPDC_INST_ACCEPT_IND = Y for a given term, put a Y in this field. Saturn owns this function.
R4.10	Applicant Accepted Offer Indicator (Most Recent Decision) APPL_ACCEPT_OFFER_CURR_DEC_IND	Function	F_ADMS_check_STATUS If STVAPDC_stdn_ACCEPT_IND = Y for a given term, put a Y in this field. Saturn owns this function.
R4.11	Institution Rejected Applicant Indicator INST_REJECTED_APPLICANT_IND	Function	F_ADMS_check_STATUS If STVAPDC_REJECT_IND = Y, put a Y in this field. Saturn owns this function.
R4.12	Withdrawn Indicator APPLICANT_WITHDRAWN_IND	Function	F_ADMS_APPLICAnt_withdrawn If SARADAP_WRSN_CODE is not null, put a Y in this field. Saturn owns this function.
R4.13	Student ID STUDENT_ID	SPAIDEN	SPRIDEN_ID

View 5: Award Detail by Term

AR_AWARD_DETAIL_BY_TERM

If you are using FOCUS, the view name is RPVAWT0.

Use this view to access information related to the packaging, awarding, and disbursement of financial aid packages based on the aid year and term. The view includes information about parents, addresses, telephone numbers, the admissions application, application decisions, general student data, awards, funds, and need analysis. Use this view to create reports that detail financial aid awards by term.

Tip

Notice that this view is similar to the previous one. Be sure to use the one appropriate for your reporting need. ■

Below is a list of the main database tables accessed by the Award Detail by Term (AR_AWARD_DETAIL_BY_TERM) view.

- RCRAPP1 Financial Aid Application Table – Part 1
- RFRBASE Fund Base Data Table
- ROENRNL Financial Aid Enrollment Table
- RPRATRM Award by Term Table
- SARADAP Admissions Application Repeating Table
- SARAPPD Student Application Decision Repeating Table
- SGBSTDN Student Base Table
- SPBPERS Basic Person Base Table
- SPRADDR Address Repeating Table
- SPRIDEN Person Identification/Name Repeating Table
- SPRTELE Telephone Table

Key Attributes

Tip

Refer to the Overview chapter for a complete description of a PIDM. ■

The key attributes of this view are

- Fin. Aid Award Personal ID Master PIDM_KEY
- Award Aid Year AID_YEAR_KEY

Table 5: Award Detail by Term View Attributes (cont)

View 6: Student Summary for Financial Aid

AR_FINAID_STUDENT_SUMMARY

If you are using FOCUS, the view name is ROVSTU0.

Provides the ability to include pertinent student information in financial aid reports. This view provides one location to access student data related to a group of admissions applicants or students who have applied for financial aid. This view includes information about personal data, addresses, telephone numbers, the admissions application, application decisions, test scores, general student data, term GPA, level GPA, billing, and the degree.

Tip

Join this view to other financial aid views when you need to access more than the core student data provided in those views. ■

Below is a list of the main database tables accessed by the Student Summary for Financial Aid (AR_FINAID_STUDENT_SUMMARY) view.

- RCRAPP1 Financial Aid Application Table–Part 1
- RORSTAT Financial Aid Applicant Status Base Table
- RORTPRD Aid Period/Term Code Table
- SARADAP Admissions Applicant Repeating Table
- SARAPPD Student Application Decision Repeating Table
- SGBSTDN Student Base Table
- SHRDGMR Degree Table
- SHRLGPA Level GPA Table
- SHRTGPA Term GPA Table
- SORTEST Test Score Repeating Table
- SPBPERS Basic Person Base Table
- SPRADDR Address Repeating Table
- SPRIDEN Person/Identification Information
- SPRTELE Telephone Table

Key Attributes

Tip

Refer to the Overview chapter for a complete description of a PIDM. ■

The key attributes of this view are

- Personal ID Master PIDM_KEY
- Aid Year AID_YEAR_KEY
- Term Code TERM_CODE_KEY
- Application Sequence No. APPLICATION_NO_KEY

Note

The Application Sequence No. key refers to the Admissions Application Sequence No. This key pertains only to those people (PIDMs) who have an admissions application. All Financial Aid applicants are returned by this view regardless of whether they have an admissions application. ■

Since the PIDM is an internal ID number unique to each Financial Aid applicant, this view returns one row of information for each Financial Aid applicant per term within an aid year. Since the Admissions Application Sequence No. is a key, a Financial Aid applicant who also has multiple admissions applications will appear multiple times on a report.

Mandatory Conditions

The following conditions *must* be supplied for the view to report information at the level identified by the key attributes.

- Aid Year AID_YEAR_KEY
- Term Code TERM_CODE_KEY

Attributes

The following list specifies the attributes included in the Student Summary for Financial Aid (AR_FINAID_STUDENT_SUMMARY) view. The list also indicates the primary Banner form and the database field or function that is the source for each attribute.

Table 6: Student Summary for Financial Aid View Attributes

Ref. No.	Attribute	Source Form	Source Field or Function Name
