

CHILD DEVELOPMENT STUDY

The SUNY Polytechnic Institute
Department of Social & Behavioral Sciences

We are currently looking for right-handed moms with babies (12 to 18 months olds) to participate in our project!

We invite you to visit our Psychology lab with your baby where a heap of toys are placed for your baby to play with. We also invite you alone to visit our EEG lab to see a set of pictures including those of your child, followed by an interview.

Each visit usually lasts about 90 to 120 minutes.

Families receive \$100 upon completion of two procedures.

Participation is voluntary & visits can be scheduled at a time that works best for families, including evenings and weekends if needed. Details will be provided upon inquiry.

Interested?
