

"Sudden death in epilepsy (SUDEP): approaches to define mechanisms, at-risk individuals, and rational interventions"

Mark Stewart, MD, PhD

SUNY Downstate Health Sciences University

This talk is hosted by Janet Paluh

Short bio:

Mark Stewart is currently dean of the School of Graduate Studies and a professor of Physiology/Pharmacology and Neurology at SUNY Downstate Health Sciences University. Dr. Stewart did his MD and PhD at Downstate and joined Downstate's faculty where his research has blended studies of normal synchronous brain activity, epilepsy, and autonomic control of systemic physiology. He co-developed the joint MD/PhD program between Downstate and SUNY Poly and has served Downstate and SUNY in a number of capacities involving research and education.
